Comments: To whom it may concern,

I have lived in Juneau for 37 years and am raising my family here. I love this town and the surrounding areas for all the easily accessible recreation opportunities and scenery. My brother has worked at Greens Creek for 20 years and he has made a good living wage and can support his family.

I support the mine tailings expansion. I believe Greens Creek follows strict guidelines and follows all rules with their tailings process. The groups and individuals against the tailings expansion are simply against all mines and in my opinion fabricate false studies and research data. Greens Creek works hard to keep their workers safe, and donates so much money and time to this community, the least we can do is support them and support the hundreds of employees that keep the mine producing seven days a week. Thank you
