Title:

Comments: Wilderness Step 1: I have no specific comment on Step 1 inventory. It is good.

Step 2 and beyond : I see no need to further recommend or expand the current wilderness even if polygon requirements are met. Reason - wilderness restricts access to foot travel or horse. Thus I cant get there for any reason or to enjoy. We all know Wildlife does not pay any attention to map boundaries. The population of folks who can get there is very small. Locking out the rest of the population is to close to privatization. It belongs to all of us.
