Comments: Please don't cut down anymore trees and please don't take away our existing trails. We have already seen a huge loss in trees over the years and need to keep what we have (removal of fallen or dead trees is okay as long as you are not destroying the forest to get to the trees- leave them if this is the case). We live here because of the existing trails and the beauty of our mountains and forest- we see it slowly being taken away for 'positive change for the better' but this typically means lost trees, lost trails and roads and homes being built where are beautiful forest used to be. So many po g time locals have helped to create and build the trails we have now it would be devastating to see even more of them destroyed. Please leave Frisco as it is.
