Title:

Comments: For Wilderness inventory: Connectivity should be considered an Outstanding Remarkable Value. Include all roadless areas regardless of size. Disturbed areas within boundaries of wilderness proposal should be included. These areas will become wilder over time. Mature and Old Growth Forests should be designated as having Outstandingly Remarkable Value . Include all areas recommended for Wilderness classification by the Citizen Alternative.

For the Wild and Scenic River Inventory: Apply cutthroat trout and bull trout presence as Outstandingly Remarkable Resource Value. Include all rivers recommended for Wild and Scenic in the Citizen alternative. Apply the Climate Shield data as an Outstanding Remarkable value. And finally, include all rivers found to be suitable for Wild and Scenic Classification in the 1991 Lolo Nation Forest Plan Amendment 12.
