Comments: The Black Hills is home to many and has been for 1000's of years. As a resident we can already see the atrocities that have arose from other mining projects around the Black Hills. The views are degrading and people are getting hurt. It is proven that mining yields dirty water as well as eye sores throughout the areas they are spread. Do we want to leave nothing for our kids to be desired? Is this not why we live here, to be surrounded by beauty and ability to enjoy nature and all its safety? Please consider why people live here and what a detriment this would be to the area, it's visitors, and most importantly the ones that live and love it here.
