Title:

Comments: I am a long time local who married into a family that has over 60 years of history in Frisco and Breckenridge. I have several concerns.

1. What is the expected timeline for this project?
2. During this work will there be additional opportunities to give feedback and possibly reassess the current work?
3. where is the financing for this coming from?
4. After COVID, the incomprehensible amount of people that came to the county, for fresh air and space, changed this community not in a positive way. Why would we encourage more people, unprepared, unaware, and that do not care about our land, animals and community, easier access to our backyard? They take, too much.
5. Is there a study regarding the impact of this proposal on the local wildlife?
6. Who would be doing this work? Locals? And if not, how will these workers be compensated and where will they live?
7. There are miles of single track that locals have created and managed for decades. I have personally biked with a chainsaw to clear fallen limbs etc. in the early summer. Will these trails be eliminated? Or opened to the masses?
8. The trees that have already been cut and put into burn piles near Rainbow Lake... how does that fit into this project?
9. Finally... will I receive feedback from these comments? And will they be publicly shared?

Thank you.
