Title:

Comments: I greatly object to any drilling or mining to this area as there is no benefit for anyone except a company out to make money while destroying our beautiful hills. These areas are used by many within the community and tourist. Our community has no benefit to this occurring. It will destroy our roads and nature. If we continue to let companies in this country destroy our recreation areas in nature we won't have any left. This also will not only negatively impact our community's people it will negatively impact animals. The people within this company do not live here and have no care for their negative impact on our community and surrounding area. I have never seen somewhere a company successfully do reclamation on land. We are left with the mess they create all for their greed. This needs to be looked at for the long term impact it will have on all.
