Title:

Comments: Is there nothing off limits to these companies????? Drilling in the middle of an established trail system that people have used for years and have invested their time, money and voluteer work in? You let companies come in and make a mess (yes this company has a bad history) of a pristine area. Why are they exploring if they don't think they can turn it into a mine. This has to stop or the established recreation areas we have enjoyed and hoped the next generation would also be able to use will be gone.
