Comments: Environmental Impact Statement with alternatives is needed. The EA does not give a fair assessment of the impacts or any alternatives for TSVI plans. The community has many issues with this EA paid for by TSVI. The actual water rights for TSVI is 21.45 acre-feet not 200. Deny the base to base gondola because it will impact access from the public to these lands. We need to see the impact a 5 million gallon water tank will have on the water levels for the valley.
