Comments: As TSV grows and attracts more people, all of those that come from the North will be traveling South on Highway 522 and turning East on B 143 aka Hondo/Seco road , traveling to TSV. This is the case right now. The Hondo/Seco rd. is an "un-improved" road. The pavement is narrow, with damaged edges and many "pot holes". In an attempt to slow down traffic, some speed humps were constructed in the area of Nostra Senora Deloris Church with varying results. The Hondo / Seco road is also used by pedestrians as there are no sidewalks. The road is too narrow. I am not interested in having the area where i live (neighbor hood) disrupted by an increase in automobile traffic on an ever deteriorated road pavement, while TSV profits.

"Growth" is not the inevitable option where ground water is already being depleted.

Taos Sky Valley is large enough now.
