Comments: Kudos on the incredible level of detailed information provided. While I'm not knowledgeable enough about the risk mitigation component of the work proposed to comment on its efficacy, I want to bring up two points. First, I, and many residents of Summit County, use the trails in the impacted area multiple days during the week throughout the entire year and want to be sure any work done only augments the existing system. I particularly like that you are taking into account winter biking usage. Second, the economic impact of the trails and outdoor activities to Frisco, Summit County and CO cannot be understated as this is one of the key drivers of tourism spending.
