Comments: Mining on public land in the Black Hills needs to stop! We have an incredible gift of public lands in this small section of the State and we seem to destroy more and more of it every year. If it's funding your after there are better ways to get it than by destroying the land and taking all it's resources. Increase the amount for out of state off road trail passes. Charge a nominal fee for access to certain public lands. Those two areas alone would generate more income over a longer period of time than mining would. Stop this disgrace to our beautiful home!!!
