Comments: What is going on with the Carson National Forest? Where is the proper EIS of the TSVI proposal? Why haven't public comments been taken seriously, or even into consideration prior to this? With water being such a critical aspect to the life and communities below the ski valley, why haven't the impacts of capturing, storing and holding it been studied in a non-partisan and objective way? And what are the long-term impacts of all this development? Please do better.
