Comments: We who have lived in this area for centuries know that water in this area is precious, some years there is very little rain or snow.
We live here year round and need our water for existence. This is all about ski fun. I love skiing. But not enough to starve people of water...water is life food. Also do to the huge fire in the next county to the tune of 350,000 acres alot of extra wildlife has moved this way they need the space more to survive. Please do not allow this. Our water survival depends on it. Thank you.
