Comments: I have read the proposal for "Frisco Backyard". I do understand the goal, but the current scope allows for a "total clearcut" of the existing forest within the 11 zones. That would be a heavy handed solution and would severely impact the ecosystem that we currently enjoy. I believe there is a compromise that would still preserve the nature of this area and provide the fuel reduction you seek. I look forward to seeing a more specific proposal concerning potential cutting in the Frisco Backyard.
