Comments: As a Frisco resident and daily trail user in this area I support some strategic fuel reduction to protect this community from the threat of wildfire. BUT this plan is totally out of scale in terms of size and is "tone def" to the amount of uses, both human and wild, who would be affected. Please consider scaling this down or other non-clear cut options to help with fuel reduction. Additionally, I propose a year round closure of the Minor's Creek Road gate to help reduce dispersed camping in the area and thus the constant threat of unattended campfires and other mechanical spark potentials.

Thank you for taking comments on this matter.
