Title:

Comments: Polygon 5 and 8 are well represented in the dotted areas. All darker areas should be included in the dotted designation. Polygon 8 should be designated recommended wilderness. Polygon 5 should maybe receive some kind of recreation designation. The darkened areas in the south west portion of polygon 9 and the undotted areas should be included in the dotted portion of 9. These areas were burned and should be included in the roadless for wilderness recommendation. Polygon 1 and 2 should remain that way and have roadless in the Idaho Panhandle.
