Comments: Greens Creek is an engineering marvel. Anybody who gets a chance to visit the site will see this incredibly thoughtful engineering that has been implemented in the entire site. The tails expansion would be thoughtfully engineered as well. It's a beautiful place and the people who work there; with myself included appreciate the nature that abounds the island. Greens Creek is capable of engineering this expansion with minimal impact to nature and I'm sure they've already thought of that. Truly a modern marvel.
