Comments: Apply connectivity as an Outstandingly Remarkable Value;

Please Include all roadless areas, including those under 5000 acres. These are vital as secure habitat for grizzly bears and other wildlife and for connectivity. I don't believe we need to build new roads at this point in time in these areas.

Please include areas with past disturbance that is now considered "substantially unnoticeable." These areas are critical to connectivity and will become totally unnoticeable over the life of the forest plan process as long as they remain undisturbed.

Please include Mature and Old Growth Forests as an Outstandingly Remarkable Value.

Please include all areas recommended for Wilderness classification by the Citizen Alternative.
