Comments: To whom it may concern,

I have read the proposed plans for expansion of the tailings and I believe that alternative D will have the most benefit with the least impact on Admiralty Island's environment and our National Monument while still allowing for important and responsible resource extraction. I know first hand of Hecla's (specifically the Greenscreek's operation), commitment to the environment and dedication to the local community in which they operate. I believe the plan is well thought out and all variables have been considered and accounted for in their plan.

Thank you for welcoming the community's input and giving us a chance to be heard on an issue that affects us all.
