Comments: Hello,

I was born and raised in Juneau for almost 60 years. I spent a lot of my childhood exploring the old ruins of the AJ mine and Treadwell mine. During my teens I spent my summers in Nevada working with my Dad in open pit mining. I later went to college and studied Engineering and eventually ended up getting a job in the mining industry.

I have worked in the mining industry now for almost 35 years and In all those years I never witnessed or experienced any wrong doing associated with mining activities. All my experiences have been positive and beneficial to our environment and our economy. I am a third generation miner and hopefully one day my son will follow my footsteps.
