Comments: Hecla Greens Creek is a very responsible and upstanding mine. They provide so many opportunities to the surrounding communities in Alaska and communities all over the United States. Without companies like Hecla, a lot of Alaskans would live in poverty. I think that the north extension project will continue to allow Hecla to provide and support communities in Alaska as well as all over the US. It would be a mistake to not support such a responsible and safe company such as Hecla.
