Comments: I strongly oppose this drilling project as it will destroy public lands that are currently used to enjoy the outdoors as national park land should be. These operations would destroy natural areas that I have personally enjoyed for over 20 years and hope that my one year old daughter will be enjoying 20 years from now. I is highly irresponsible of the National Forest Service to even consider allow this on these lands as it is a misuse of resources that are set aside for public enjoyment and use not a private corporation to make a profit!!! This project should not have even been considered and is a disgusting breach of public trust in the leadership of the forest service. Ashamed. Do not destroy the beauty of this area so a company from Colorado and strip our land and destroy our recreation areas!!!!!!
