Title:

Comments: I am against the further development of the "Taos Ski Valley" for recreational use. A full environmental impact assessment has yet to be done and already the potential impacts listed are going to be so detrimental to Taos and the surrounding national forest area. Using water that we don't have to make snow, destroying forest for more human use, it all greatly impacts our already delicate ecosystem. I am an environmental science student and I understand how this will have a domino effect not only on the ski basin itself but Northern New Mexico as a whole over time.

Let them improve what they already have and work with the space they have been provided, but say no to massive expansion.

-Antoni Iannucci
