Comments: I oppose the Golden Crest exploratory drilling. It makes absolutely NO SENSE to allow mining exploration, using our precious water resources, that the mining companies admit is pretty futile! Water for our people is more important than wasting water on exploration. Furthermore, it makes NO SENSE to use our precious water for futile exploration and then have the area consider piping water in all the way from the Missouri!

No one comes to Spearfish Canyon to look at the rape of the land that mining exploration, let alone mining would cause. It disrupts the wildlife, the land, and the people.

No to Golden Crest.
