Comments: i'm in support of the mines expansion - with the positive economic impact of the mine to all of south east this should not even be in question ! the devastation of this mine closing would be felt nation wide -the loss of raw materials needed for our country in the face of possible conflict with china - russia - iran - north korea , denial of this needed expansion would in danger nation security and possibly all of our lives . tell the environmental groups that are doing the bidding of our enemies to take a long walk off a short pier ! i hope my opinion is clear , thanks for your time
