Title:

Comments: I was born and raised in Valdez, New Mexico, right at the base of Taos Ski Valley canyon. I grew up exploring the backcountry and wilderness inside the carson national forest. To cut access and continue with developement is stripping New Mexico of it's already limited backcountry skiing access. The environmental impact of this development will affect my familys home and many others near us by contaminated the valueble watershed in our area. I am against the continuation of developing without the proper assessment on the environmental impact.
