Title:

Comments: The make enough money polluting the environment they have now!! Draining more water from the lower section is going to reduce the amount of water other people will have, eliminate the possibility of other smaller businesses starting up as well!

Plus deforestation and tearing up a natural environment just for corporate gain. It's a bad idea

They claim to be a B corporation but wow the amount of waste and garbage they produce is incredible! I know first hand

Do not allow them to add another gondola please for the sake of the lower valley and the future of water rights!!!
