Comments: We can not allow our natural resources to be for profit for a elite few. Especially as it will have devastating impacts on our actual residents, human, animal and plant. I'm sorry the sky valley doesn't get enough snow to accommodate their needs, but the ski valley andr bacon take that risk as it depends upon nature, our tourist season of skiing does not justify the long term damage this will cause. We all depend on taos and its surrounding areas to be Beautiful. I really can't believe its even a consideration to decimate our water and natural resources.
