Comments: Taos Ski Valley Inc (TSV) has overstepped. Their proposed developments are not only excessive and unnecessary, but will harm the watershed downstream from the development and restrict access to public lands. They have no right to limit public access to public lands. Carson National Forest MUST END THIS NOW! Order the Environmental Impact Survey (EIS). Do not settle for the Environmental Assessment (EA). Better yet, stop the whole project now before it's too late.

The ONLY improvement I would allow TSV to complete at this time would be updating the existing chair lifts as they are in need of it. Everything else proposed is ridiculous and excessive.
