Comments: Please halt further expansion of the Taos Ski Valley! I am very concerned about the impacts that this project will have on the ecosystems in the Taos Ski Valley, human and non-human communities downstream, as well as access to public lands. This project is not necessary. Please protect the Taos community, it's ecosystems, and access to public land for all for centuries to come. The Forest Service is allowing our PUBLIC lands to be controlled by private corporations. There has to be a balance in the development. The Village is completely overwhelmed by the sewage, garbage, and water use created by TSV,LLC. I ask that you, the Forest Service, call for a moratorium on construction in the Rio Hondo watershed until a real Environmental Impact Study is implemented.
