Comments: What makes this area soo amazing is the outdoors and the cleanliness. Destroying the environment by mining would destroy the natural habitat for our amazing wildlife and potentially contaminate our water supply. Just look at the destruction of the land surrounding Deadwood and Lead. Do we want more of that? No way, let's save the natural environment. Ask yourself who benefits from drilling and who suffers. Obviously the destruction of the beautiful black hills now will destroy it for many many many years to come
