Comments: As a stakeholder in TSVI and a landowner with an acequia that is fed from the Arroyo Hondo, I demand that TSVI's expansion plan be suspended until a proper and legal Environmental Impact Study is conducted. Also, there needs to be more town hall meetings and input from the countless individuals and families who live, work, farm and fish downstream from TSVI.

For as self proclaimed "B Corp" , TSVI sure is jamming their "Build Bigger Not Better" agenda down our throats with little if any concern for the environment or our community as a whole.
