Title:

Comments: Good afternoon. I strongly support Alternative D. 23 acres is a tiny area of the Tongass but provides tremendous benefit to Juneau and Southeast Alaska. Greens Creek is the largest private taxpayer foe Juneau and the people who work at Greens Creek are fully integrated into the community. The larger the area Greens Creek's tailing area, the further it can look out in terms of its operations. This keeps the benefits coming to Juneau for a longer time. We have so few mines in Southeast Alaska compared for example to British Columbia (which has similar geology) that it makes sense to nurture what we have. Please select Alternative D.

Yours truly, Jim Clark.
