Title:

Comments: Please do not allow the mining companies to explore and/or drill in the Black Hills. The area around Spearfish Canyon is a precious water supply. Clean fresh water is a basic human need. Once the mining company poisons the water, the water will be contaminated forever. We only have a finite supply of water on the planet. Please protect the clean water which is a precious life necessity. Any mining operations will destroy the environment for our generation and every future generation.
