Title:

Comments: I as a life long Spearfish resident am concerned about several topics in regards to this project. I am concerned about cattle herds that many ranchers have in the area. I am concerned about many of the different native plants that are already struggling enough with recent ecological events. (Prolonged drought, invasive species, etc.) I am also concerned about leisure trails, ranging throughout the entire area. My concern is that many of these trails will either fall out of repair or will become altogether off limits/unusable.

Please consider my, and many other members of the public's thoughts and feelings.
