Title:

Comments: I hate that this is even a possibility. Who will benefit from this besides golden crest and how much money are they offering you to sell out your areas best interests? Shame on everyone involved with pushing this forward, you make me sick. Destroying our recreational trails/some of the last peaceful places in this country and jeopardizing our water table in one fell swoop. Who in their right mind would think this is in any way, shape or form the right thing to do? It's down right disgusting and pitiful to let this happen. Wake up and don't succumb to the all mighty dollar, some things are worth more.

Peace and elbow grease,

GH
