Title:

Comments: In addition to the obvious detrimental and deleterious impacts on the wildlife and natural environment in the Black Hills, this mining operation would work to destroy the very lifestyles of the multitudes of people like myself who are proud to call Spearfish home explicitly because of the great outdoors of Spearfish Canyon and all the wonderful trails along Tinton Rd. To even think about taking that away from those who choose to live here over anywhere else -- with the right to enjoy the natural world around us -- is an egregious notion that should be met not only with complete rejection but also with the utmost shame.
