Comments: The recreational and viable resources such as wellness and fitness that are abundant on our bighill trail system cannot be replaced. The community has built an institutional infrastructure of people who are passionate about their work and the environment that promotes and provides an important foundation for a healthy and sustainable future. By supporting the development of exploiting natural resources in our backyard we would only destroy the biodiversity and the ecosystem that is our home. We are stewards of our land and we cannot allow business to exploit those resources at the cost of failing our hard earned right to preserve our land. Don't mine Bighill or any other land in our Black Hills!
