Comments: How will this effect the tourism in our town? An important part of the community is our tourism and if the canyon is destroyed then how will that affect our income. I am a server so my income relies on the tourism. I also mountain bike a lot and the trails that I love to ride will probably be wrecked. Not to mention how it will effect our water? The reputation that mining companies have are that they pollute and destroy the area around these mines. This probably won't offer any jobs for people who live in this area. I love the black hills and I am glad to call it home so don't destroy the area that I love. Thus I am against the gold mining.
