Comments: For years I have hunted, hiked, fished, and camped in the beautiful Black Hills. Hiking different trails along Tinton is what made me fall in love with South Dakota and why I took residency here after my college years. My wife and I are a coal mining family, and understand the importance of unearthing coal for energy. However, even thinking about the possibility of disrupting and implementing exploratory drilling in this region is a disgrace to everything a sportsman/woman stands for. We are taught to leave the land better than when we have visited it. There is no doubt in my mind that drilling and mining this area wouldn't drastically impact wildlife for generations to come. That's why I am asking that you perform the EIS full NEPA study. Thank you
