Title:

Comments: Please be mindful of the long-range future impacts of this project. The very real risks this type of activity present toward polluting this watershed and physically defacing a beautiful and meaningful region of the Black Hills are far more substantial than any short-term monetary gain that might be gained. It is time we used foresight and wisdom to guide the decisions we make regarding resources under the public protectorate. Once it is gone, we will never get it back! Thank you for giving us this opportunity.
