Title:

Comments: I have been a Spearfish resident for 19 years. I love the Black Hills and as a concerned resident am requesting an EIS (full NEPA study) before any mining is allowed to take place in this beautiful area. The delicate balance with which the flora and fauna, birds and fish all coexist is something to be respected or at the very least considered before allowing a potentially destructive, profit motivated industry into this place that ALL of my neighbors love and cherish.
