Comments: Our forests are valuable in and of themselves, because God made them, and not simply as commodities to be bought, sold, and exploited. Please keep this in mind when you make decisions on how to take care of the forests. DO NOT go through with this plan to allow massive logging in the Methow Valley. It is a beautiful and peaceful area, and that is part of its value. Thank you for not allowing this project to continue. You are better than that. The Forest Service WILL DO THE RIGHT THING.
