Title:

Comments: Throwing down a big no to this project. No reason to be polluting our clean water sources and disturbing the ecosystem within this area for some drilling. The clean water is first and foremost my main concern and the concern of many others. To put lives in danger whether that be short and/or long term should be out of the question. As a resident who has lived in the hills for almost 3 decades, no mining and amount of money is worth putting the health and lives of others at risk.
