First name: Alan

Last name: Fischer

Organization:

Title:

Comments: As a long time resident of the northern black hills, and avid outdoor enthusiast, I am extremely opposed to this project.

An Environmental Impact Statement is required for building new trails, and trails are a public benefit. A project that is this destructive and brings no public value should absolutely require an EIS.

The only result of a project like this is increased water pollution, additional dangerous vehicle traffic, and destruction of the natural environment for private monetary gain.
