Comments: As a resident of Spearfish , i am concerned about the effects of drilling and mining on our water supply. Water is not unlimited. It os the one thing we need to survive, we should not be allowing it to be used at such a rate by the mining companies. I also am concerned that a major recreation area that i personally use regularly fir skiing and biking and hiking will be the chosen location. With the amount of outdoor recreation in our community and the draw it has for tourism, i am against sacrificing the land for drilling or mining.
