Title:

Comments: Absolutely do not decommission 52 miles in project. Let old roads just go back to nature, not "ripping" them up. When using "the ripper", it just makes it impossible for anything to use - causes lots of weeds to come up. Knapweed - big thistles.

In favor of making forest thinned to help with fires.

Little Bridge - Sheep - Deer Creeks [are] prime wood gathering area, also horse and snowmobile road. Deer hunters use. When closing [road] above old cabin, leave old road for trail. Do not use a "ripper" on this section.

If new [road] construction then gated, leave open for horses.

I approve of cattle grazing on ranges, need sheep to clean our meadows that are getting so overgrown.
