Comments: As someone that has been involved with drilling wells in the black hills for years, people need clean drinking water. I would love to see a report from the forest services showing the expected impact of any on the effects of core drilling would have on our aquifer. From what I've heard this is only an exploration and not a mining operation, I would like to see the forest service clarify to people what is proposed. I know they already have and people refuse to do any of their own research or read what is actually proposed. Overall I support the golden crest exploration and the jobs it brings to the black hills.
