Comments: The detrimental impact that mining and drilling sites will have on the beauty of the black hills as well as the impact it will have on the functionality of the trail systems for hiking and biking in this area is HUGE. I grew up in Spearfish and visit often for the outdoor activities and natural beauty of the area. Mining and drilling will destroy the natural beauty and derail the activities that keep me coming back to the hills. Please stop the approval of this project and the negative impact far outweighs the positive.
